Work Experience

BrainRidge Consulting Aug 2026 – Present
Full Stack Engineer *Toronto, ON*

- Cut content publishing time by **30%** via asset minification and **HTML/CSS** validation in an event-driven **Node.js/TypeScript** pipeline on **AWS Lambda**, integrated with **SQS** and **EventBridge**
- Architected a ZIP-based workflow that bypasses Contentful's file size limits through server-side extraction and upload to NetStorage, unblocking **50+** previously unsupported files
- Drove bulk publishing failures from **20–30** to under **5** per **300+** entry batch by resolving timeouts and malformed assets, writing actionable error messages to enable the content team to self-diagnose
- Owned an entry creation modal in **React** that prepopulates name fields and environment tags, cutting entry configuration time by **70%** for **100+** internal users
- Redesigned an inventory management workflow into a structured tabular **React** interface that surfaces key entry details inline, reducing entry metadata lookup from **3 clicks to 0**

Federato Technologies Sep 2025 – Dec 2025
Forward Deployed Engineer Intern *Menlo Park, CA*

- Owned a full-stack **Node.js/GraphQL** internal tool that validates and diffs policy form changes across environments, cutting manual QA effort by **80%**; adopted as the company's standard pre-deployment check
- Built asynchronous **JavaScript/Python** workflows to process large-scale insurance policy datasets, parallelizing operations for **5x** higher throughput
- Diagnosed a failed Salesforce sync that left required fields null across **2,000+** policy records, writing **PostgreSQL** backfill queries to restore every affected record

Rakuten Kobo Sep 2024 – Apr 2025
Software Engineer Intern *Toronto, ON*

- Shipped a **C#/.NET** Quick Buy feature enabling direct checkout without the shopping cart flow, lifting successful transactions by **6.4%** for a projected **$748K** in annual revenue
- Root-caused a failure in the **cron job** that auto-renews Kobo+ subscriptions and wrote **SQL** recovery scripts that restored subscription data for **500+** affected users
- Migrated **150+** UI tests from **Selenium** to **Playwright** on **Jenkins CI**, covering **100%** of critical user flows and eliminating **10+** flaky tests

Insurance & Mobility Solutions Jan 2024 – Apr 2024
Mobile Software Engineer Intern *Waterloo, ON*

- Delivered **iOS** (**SwiftUI**) and **Android** (**Kotlin**) apps serving **500+** users, making architecture decisions (**MVVM**, **Firebase**) and integrating **10+ API** endpoints
- Reduced memory usage by **20%** by optimizing state management and building reusable **UI components**

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C#, SQL, Kotlin, Swift
Frameworks & APIs: React, Node.js, Angular, GraphQL, REST, .NET, Spring Boot, Flask, Django, SwiftUI
Cloud & Databases: AWS (Lambda, SQS, SNS, EventBridge, API Gateway), PostgreSQL, Docker, Firebase
Tools & Observability: Git, Claude, Jenkins, Playwright, Selenium, XCTest, CloudWatch, DataDog

Education & Certifications

University of Waterloo Sep 2021 – Apr 2026
Bachelor of Computer Science, Co-op Program *Waterloo, ON*

AWS Certified Solutions Architect – Associate (SAA-C03) Sep 2026
